

flexi foot

The *flexi* foot is used to support small pipework, runs of cable tray or an alternative to supporting condensing units, air source heat pumps or a variety of outdoor equipment.

The *flexi* foot with steel strut

The *flexi* foot with strut comes in four sizes 250mm, 400mm, 600mm & 1000mm. They are manufactured from heavy duty recycled rubber and come complete with 21mm x 41mm galvanised steel strut adhered to the rubber with industrial adhesive. The rubber is strong and durable with drain slots moulded into the underside to allow standing water to flow under the foot.

Supporting cable tray and pipework

Mounting a condensing unit

The *flexi* foot universal has three M10 inserts providing the *flexibility* to support various equipment.

 **The *flexi* foot universal**

The *flexi* foot universal has been specially designed to allow even greater *flexibility*, with the installer free to bolt their own strut of varying lengths to suit any installation from 500mm to 3m in length.

The three threaded inserts in the 250mm universal allow for threaded rod to be screwed in either the two outer inserts to form a mini "H" type support, or a single piece of threaded rod to be screwed in allowing for pipe support clamps to be fitted.

The *flexi* foot universal is a *flexible* product allowing installers to create their own bespoke solutions on site.

with threaded rod and pipe clamp

3 x universal foot

2 x universal foot
