

A comprehensive range of refrigeration electrical panels to control both temperature and defrost

All models feature an attractive IP65 white thermoplastic enclosure with a large red, easy to read, 25mm high LED display.

Pego Expert series

Three models, one single-phase and two three-phase panels with built in magnetothermic differential circuit breakers, suitable for electric or hot gas defrost systems.

Single-phase Expert model

Single-phase standard panel

Three-phase standard model with built in isolator

Three-phase Expert model

Pego Standard series

Eight models for both single and three-phase systems with electric or hot gas defrost.

Three-phase panels all include a built in electrical isolator, as does the ECP300/200VDM single phase panel.

All panels can be wired for direct or pump down control, except CONP500 / CONP510 / CONP520 (direct only).
